About

Leonhard Lang's internationally renowned innovation and production center is located in the heart of the Tyrolean Alps.

Founded in 1872, Leonhard Lang has been operating as a family business for more than 150 years. Today, the focus is on medical technology. Over the years, joint top performance has resulted in production, special machine construction, process management, and research and development at the highest level. The electrode systems developed and produced by Leonhard Lang are in use worldwide.

We will always take the sustainable path

A resource-conserving approach to nature is important. The way we treat our environment today, determines our tomorrow. That is why Leonhard Lang takes action in all its business areas – for the health of future generations.

Skintact®

ECG Electrodes

Excellent quality ECG recordings are dependent on three main factors: good skin preparation, superior quality electrodes, and a continuous unbroken electrical pathway from the skin to the ECG machine.

Electrodes often have to perform under very strenuous conditions, therefore at Leonhard Lang we dedicate valuable time and attention to the design and construction of our electrodes; we then carefully select only the finest quality materials and component parts to produce them.

Uniquely, we design and build our own machines that are state of the art in manufacturing technology ensuring you quality products that are second to none. “Connect with quality” is our motto and our goal is to provide you with consistently reliable products.

Conductive Gels

Different ECG applications require gels that are precisely tailored to their specific performance demands. To ensure optimal performance for every application, Leonhard Lang develops and manufactures its conductive hydrogels in-house.

This guarantees maximum freshness, consistent quality and reliable conductivity. Our gels combine excellent signal response with skin-friendliness – supported by continuous innovation and full process control at our production site.

Aqua-Wet Gel = LIQUID GEL

Our Aqua-Wet Gel ensures particularly fast signal pick-up at the start of the ECG, regardless of skin preparation. Skintact® ECG electrodes with Aqua-Wet Gel are the best choice for short-term applications.

Aqua-Tac Gel = SOLID GEL

Skintact® ECG electrodes with Aqua-Tac Gel are used for both long-term and short-term applications. They can be removed from the skin without leaving any residue.

Aqua-Set Gel = SOLID WET GEL

Our Aqua-Set Gel combines the advantages of liquid and solid gel. Its special formula guarantees excellent electrical conductivity. The water content of Aqua-Set Gel ensures rapid reduction of skin resistance.

Backing Material

PE Foam

Demanding conditions, such as use in emergency care or for stress tests challenge the stability and reliability of ECG electrodes. Leonhard Lang's PE foams are the right choice – they are impermeable to liquids and thus protecting the sensor and gel. The thin PE material allows maximum flexibility.

Microporous Tape

The skin-friendly, microporous tape adapts well to the contours of the body and thus increases wearing comfort. It also allows moisture to pass through. Skintact® ECG electrodes with microporous tape allow the skin to breathe and transpire – which is particularly important for long-term applications.

Soft Cloth Backing

Skintact® ECG electrodes made of soft cloth backing offer all the advantages of nonwoven electrodes, but with significantly increased elasticity. Thus, they adapt well to body movements. Electrodes made of soft cloth backing offer a high level of wearing comfort for long-term applications and adhere reliably even to active patients.

Clear Tape

The clear tape is transparent. The patient's skin can therefore be observed during the entire wearing period. Clear tape reliably protects the sensor area against liquids.

Connectors

- **Stud**
- **Tab**
- **Tab'n'Snap**
- **4 mm Banana Adapter**

Information

All our Skintact® products are tested according to applicable standards, ensuring maximum safety and reliable performance.

Skintact® ECG electrodes comply with standard ANSI/AAMI EC12 for ECG electrodes, ISO 10993 for biocompatibility, and the European Medical Device Regulation (MDR).

Stress Test & Holter

Bonding safe

Skintact® stress test electrodes with reinforced adhesive stick reliably. Even when patients transpire heavily. The PE foam backing is also impermeable to liquids. The ECG electrodes are therefore also suitable for echocardiograms.

Comfortable to wear

The particularly skin-friendly Skintact® ECG electrodes T-604 B, T-VO01 and T-VO02 allow the skin to breathe and provide excellent wearing comfort, even during prolonged use.

Easy to handle

The easy-to-open pouch and the peel-off aid of each Skintact® ECG electrode facilitate daily handling. On the Skintact® offset electrodes, the cables can be connected even more conveniently and reduce the risk of squeezing gel onto the electrode surface.

The PVC-free variant

Like all Skintact® ECG electrodes without pre-attached leads, also the Skintact® offset electrodes are PVC-free

*** Innovative Technology**

The adhesive ring of the T-VO01 and T-VO02, made of PE foam, protects the gel area and provides additional adhesive strength. In combination with the offset connection, it significantly reduces motion artifacts.

FS-VB01

Use	stress test
Backing	PE foam, enhanced adhesion
Dimensions	52 × 35 mm
Gel	liquid
Packaging	30/pouch, 1200/box, 4800/case

Premium electrode with offset connection

T-VO01 *

Use	holter, event recording
Backing	microporous tape
Dimensions	66 × 60 mm
Gel	liquid
Packaging	30/pouch, 300/box, 1800/case

Premium electrode with offset connection and with foam ring around gel surface; breathable material

FS-VB04

Use	stress test
Backing	PE foam, enhanced adhesion
Dimensions	52 × 35 mm
Gel	liquid
Packaging	30/pouch, 750/box, 3000/case

Premium electrode with offset connection and adapter for 4 mm banana plug

T-VO02 *

Use	holter, event recording
Backing	microporous tape
Dimensions	Ø 72 mm
Gel	liquid
Packaging	30/pouch, 300/box, 1800/case

Premium electrode with offset connection and with foam ring around gel surface; breathable material

FS-50

Use	stress test, emergency care, echocardiogram
Backing	PE foam, enhanced adhesion
Dimensions	Ø 50 mm
Gel	liquid
Packaging	30/pouch, 1200/box, 4800/case

Impermeable to liquids

T-604 B

Use	holter, long-term monitoring
Backing	microporous tape
Dimensions	Ø 60 mm
Gel	solid wet
Packaging	30/pouch, 1200/box, 4800/case

Breathable backing material, textured liner for skin preparation

Resting ECG

Skintact®

Excellent Conductivity

Skintact® Easitabs with Aqua-Tac gel provide reliable signal quality. The premium versions FS-WB00 and FS-WA00 feature the Aqua-Wet gel and are particularly suitable for resting ECG examinations, even under demanding conditions.

Bonding safe and convenient

All Skintact® Easitabs feel soft and stick absolutely reliably. Nevertheless, they are removed after application without irritation or loss of hair.

Superior Safety

Proper use of Skintact® Easitabs reduces the risk of cross-infection, whereas reusable suction electrodes can harbor bacteria and fungi.

X-ray translucent and MR conditional

All Skintact® Easitabs can be safely used during imaging procedures.

RT14

Backing	Paper/PET
Dimensions	34 × 14 mm
Gel	solid
Packaging	100/pouch, 500/box, 5000/case

X-ray / MR conditional, Easitab, 10 pcs./card

RT38

Backing	Paper/PET
Dimensions	34 × 20 mm
Gel	solid
Packaging	100/pouch, 500/box, 5000/case

Easitab, 10 pcs./card, X-ray / MR conditional

RT34

Backing	Paper/PET
Dimensions	34 × 22 mm
Gel	solid
Packaging	100/pouch, 500/box, 5000/case

Easitab, 10 pcs./card, X-ray / MR conditional

RT74

Backing	Paper/PET
Dimensions	34 × 26 mm
Gel	solid
Packaging	100/pouch, 500/box, 5000/case

Easitab, 10 pcs./card, X-ray / MR conditional

FS-WB00 /10

Backing	PE foam, enhanced adhesion
Dimensions	37 × 28 mm
Gel	liquid
Packaging	100/pouch, 500/box, 3000/case

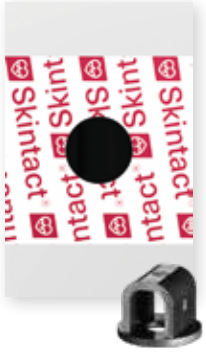

Premium Easitab, particularly for demanding conditions, 10 pcs./card, X-ray / MR conditional

FS-WA00 /10

Backing	PE foam, enhanced adhesion
Dimensions	45 × 32 mm
Gel	liquid
Packaging	50/pouch, 500/box, 3000/case

Premium Easitab, particularly for demanding conditions, 10 pcs./card, X-ray / MR conditional

FS-RB4 /5

Backing	PE foam, enhanced adhesion
Dimensions	44 × 28 mm
Gel	liquid
Packaging	50/pouch, 1500/box, 6000/case

With adapter for 4 mm banana plug, 5 pcs./card

Monitoring

Adhere even better

Skintact® electrodes for monitoring ECG are available with standard adhesive or with reinforced adhesive – product names starting with „FS-“.

Easy to handle

An easy-to-open pouch and the peel-off aid for easy use.

Water repellent

All foam ECG electrodes are impermeable to liquids and thus protect the sensor.

FS-521

Backing	PE foam, enhanced adhesion
Dimensions	50 × 35 mm
Gel	solid
Packaging	30/pouch, 1500/box, 6000/case

Impermeable to liquids, ideal for short-term monitoring and for use in the operating room

CT-601

Backing	transparent clear tape
Dimensions	Ø 50 mm
Gel	solid
Packaging	30/pouch, 1500/box, 6000/case

Skin reaction easily and quickly detectable

F-601

Backing	PE foam
Dimensions	Ø 50 mm
Gel	solid
Packaging	30/pouch, 1500/box, 6000/case

Impermeable to liquids, ideal for short-term monitoring and for use in the operating room

T-60

Backing	microporous tape
Dimensions	Ø 60 mm
Gel	liquid
Packaging	30/pouch, 1200/box, 4800/case

More comfort for patients due to breathable backing material, ideal for long-term monitoring

F-55

Backing	PE foam
Dimensions	Ø 55 mm
Gel	liquid
Packaging	30/pouch, 1200/box, 4800/case

Impermeable to liquids, ideal for short-term monitoring and for use in the operating room, large adhesive area
Alternative: F-50 with 50 mm diameter

T-601

Backing	microporous tape
Dimensions	Ø 50 mm
Gel	solid
Packaging	30/pouch, 1500/box, 6000/case

More comfort for patients due to breathable backing material, ideal for long-term monitoring

F-TB1

Backing	PE foam
Dimensions	55 × 50 mm
Gel	solid
Packaging	30/pouch, 1500/box, 6000/case

Impermeable to liquids, ideal for short-term monitoring and for use in the operating room

W-601

Backing	soft cloth
Dimensions	Ø 50 mm
Gel	solid
Packaging	30/pouch, 1500/box, 6000/case

More comfort for patients due to breathable backing material, ideal for long-term monitoring

Universal

Skintact®

Lower costs

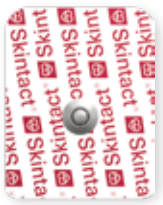

Our Skintact® ECG electrodes on cards of 6 or 10 pieces offer the usual Leonhard Lang quality at reasonable prices.

Fast and comfortable

These electrodes come on cards of 6 or 10 pieces.
A perforation in the middle allows one card to be separated into two handy strips.

Feel free to leave the gloves on

The label material overlaps the electrode and creates a lift tab which allows the clinical staff to handle the electrode easily even when wearing surgical gloves.

FS-RG1 /10

Backing	PE foam, enhanced adhesion
Dimensions	41 × 32 mm
Gel	solid
Packaging	50/pouch, 1500/box, 6000/case

Card of 10. also available on card of 6 (FS-RG1 /6)

FS-RG /6

Backing	PE foam, enhanced adhesion
Dimensions	41 × 32 mm
Gel	liquid
Packaging	30/pouch, 1200/box, 4800/case

Card of 6, also available with standard adhesion (F-RG /6)

FS-TC1 /10

Backing	PE foam, enhanced adhesion
Dimensions	41 × 35 mm
Gel	solid
Packaging	50/pouch, 1500/box, 6000/case

Card of 10, also available on card of 6 (FS-TC1 /6)

FS-TF /6

Backing	PE foam, enhanced adhesion
Dimensions	51 × 43 mm
Gel	liquid
Packaging	30/pouch, 1200/box, 4800/case

Card of 6, also available with standard adhesion (F-TF /6)

© Allgemein öffentliches Bezirkskrankenhaus Kufstein

MR-conditional & Radiotranslucent

Carbon snaps save time and costs

MR-conditional Skintact® ECG electrodes are equipped with carbon snaps. This saves time and costs: If the electrodes have already been applied, they do not have to be removed before X-ray or MRI examinations.

Skintact® Tab'n'Snap – two connection systems

With two integrated connection systems, Skintact® Tab'n'Snap electrodes ensure seamless patient transfer without the need for electrode replacement.

F-40C

Backing	PE foam
Dimensions	Ø 40 mm
Gel	liquid
Packaging	30/pouch, 1200/box, 4800/case

X-ray / MR conditional for adults and pediatrics

F-401C

Backing	PE foam
Dimensions	Ø 40 mm
Gel	solid
Packaging	30/pouch, 1500/box, 6000/case

X-ray / MR conditional for adults and pediatrics

F-50C

Backing	PE foam
Dimensions	Ø 50 mm
Gel	liquid
Packaging	30/pouch, 1200/box, 4800/case

X-ray / MR conditional for adults; available also with enhanced adhesion (FS-50C)

F-601C

Backing	PE foam
Dimensions	Ø 50 mm
Gel	solid
Packaging	30/pouch, 1500/box, 6000/case

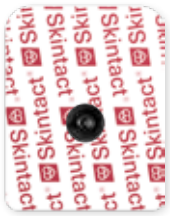

X-ray / MR conditional for adults

FS-521C

Backing	PE foam, enhanced adhesion
Dimensions	50 × 35 mm
Gel	solid
Packaging	30/pouch, 1500/box, 6000/case

X-ray / MR conditional for adults

FS-RGC /10

Backing	PE foam, enhanced adhesion
Dimensions	41 × 32 mm
Gel	liquid
Packaging	50/pouch, 1500/box, 6000/case

X-ray / MR conditional for adults and pediatrics, card of 10

FS-WA10C

Backing	PE foam, enhanced adhesion
Dimensions	45 × 32 mm
Gel	liquid
Packaging	50/pouch, 500/box, 3000/case

Premium ECG electrode with Tab'n'Snap connection for adults, card of 10

W-130C /3

Backing	soft cloth
Dimensions	Ø 30 mm
Gel	solid
Packaging	30/pouch, 1500/box, 6000/case

X-ray / MR conditional for all patient groups, adhesive area fully covered with soft hydrogel

Pediatrics & Neonates

Size and adhesive for pediatrics

Skintact® ECG electrodes for pediatrics and neonates are available in smaller sizes to meet the specific needs of smaller patients.

Offset connection

Pediatric offset electrodes, ensuring optimal positioning and minimizing the risk of artifacts – available with snap connection or a 4 mm banana adapter.

Pre-wired

For neonates, we offer pre-wired electrodes to minimize the risk of pressure necrosis.

F-261

Backing	PE foam
Dimensions	Ø 26 mm
Gel	solid
Packaging	30/pouch, 1500/box

F-VK01

Backing	PE foam
Dimensions	45 × 30 mm
Gel	liquid
Packaging	50/pouch, 500/box, 3000/case

Premium electrode with offset connection, available also with adapter for 4 mm banana plug (F-VK04)

F-301

Backing	PE foam
Dimensions	Ø 30 mm
Gel	solid
Packaging	30/pouch, 1500/box

T-401

Backing	microporous tape
Dimensions	Ø 40 mm
Gel	solid
Packaging	30/pouch, 1500/box

Breathable backing material

F-40

Backing	PE foam
Dimensions	Ø 40 mm
Gel	liquid
Packaging	30/pouch, 1200/box

W-401

Backing	soft cloth
Dimensions	Ø 40 mm
Gel	solid
Packaging	30/pouch, 1500/box

Breathable backing material

F-401

Backing	PE foam
Dimensions	Ø 40 mm
Gel	solid
Packaging	30/pouch, 1500/box

W-130C /3

Backing	soft cloth
Dimensions	Ø 30 mm
Gel	solid
Packaging	30/pouch, 1500/box, 6000/case

X-ray / MR conditional for all patient groups, soft hydrogel over the whole adhesive area fully covered with gel

PD50-SF (150)

Backing	soft cloth
Dimensions	24 × 23 mm
Gel	solid
Packaging	3/pouch, 150/box

With pre-attached 50 cm copper leads (red/yellow/black) with safety plug

PD50-F4C

Backing	soft cloth
Dimensions	24 × 23 mm
Gel	solid
Packaging	3/pouch, 150/box

With pre-attached 50 cm carbon leads (red/yellow/green) with connector for 4 mm banana plug; suitable for use during x-ray

PD50-SFC

Backing	soft cloth
Dimensions	24 × 23 mm
Gel	solid
Packaging	3/pouch, 150/box

With pre-attached 50 cm carbon leads (red/yellow/green) with safety plug; suitable for use during x-ray

PD10-F4

Backing	soft cloth
Dimensions	24 × 23 mm
Gel	solid
Packaging	10/pouch, 150/box

With pre-attached 10 cm copper leads with connector for 4 mm banana plug

Skintact®

Defibrillation Electrodes

When every second counts, patients around the world can rely on our Skintact® Defibrillation Electrodes.

In emergency cases not only the clinician's skills are required but also reliable ranges of life saving products like defibrillation electrodes. These products must perform dependably, even under adverse conditions as every second may count. Leonhard Lang's engineering team has developed reliable and safe multifunctional defibrillation electrodes. They can be used for external defibrillation, non-invasive pacing, synchronized cardioversion and monitoring.

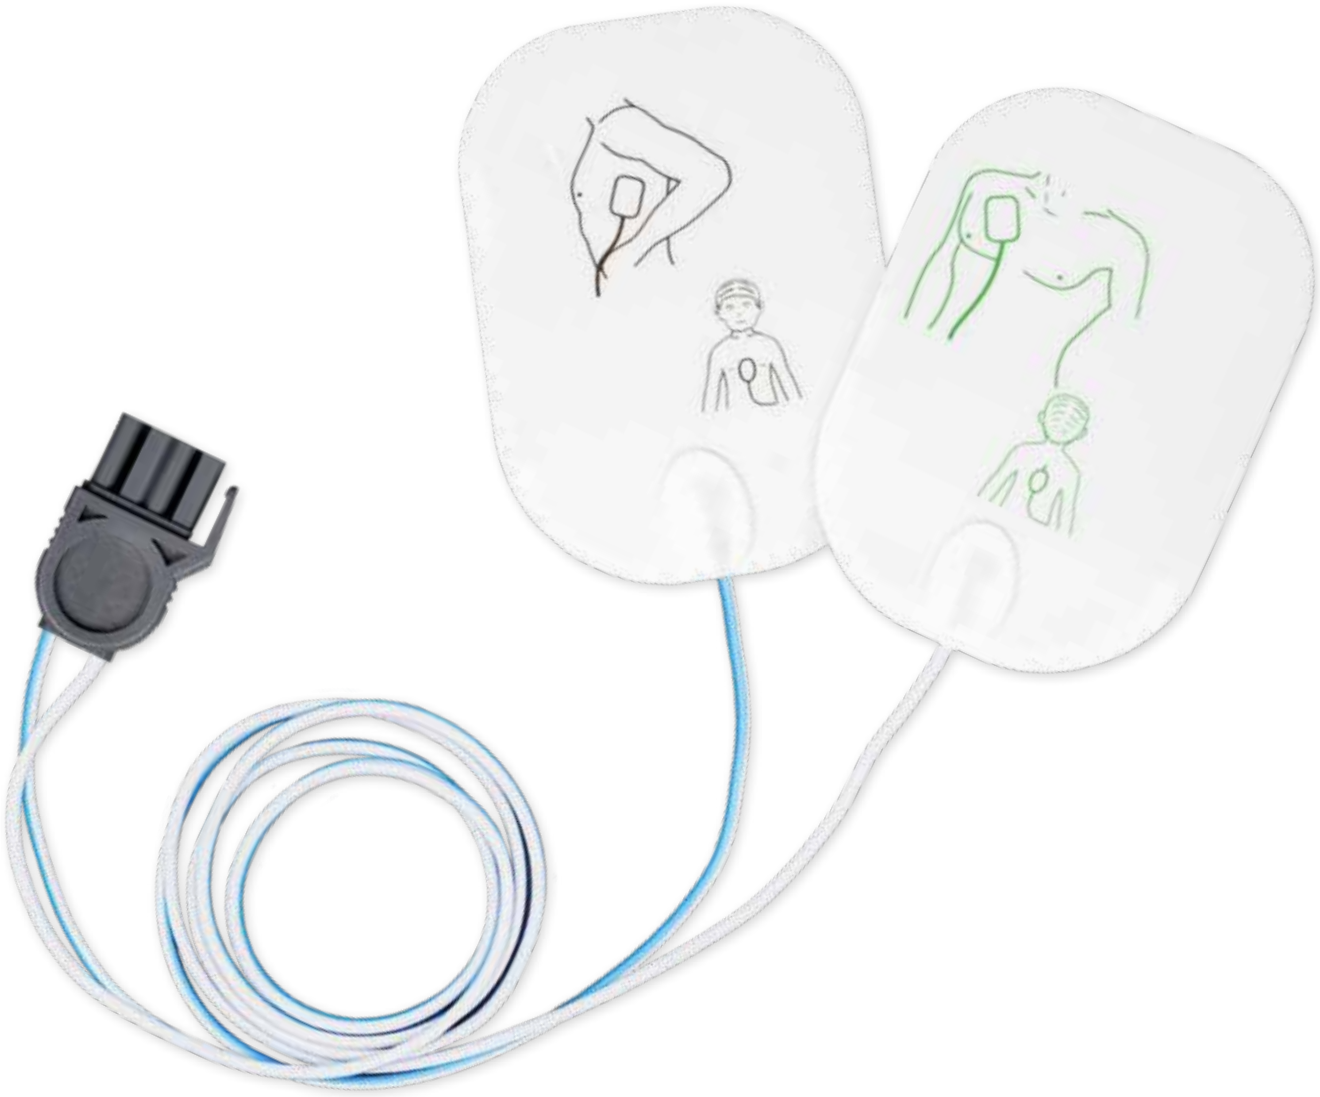

Advantages of Skintact® Defibrillation Electrodes

- Unique overlapping gel technology, developed by Leonhard Lang, prevents tin edge exposure and helps to minimize the risk of burns.
- Secure adhesion even on perspiring skin.
- Maximum contact area combined with low impedance helps to reduce thermal and mechanical stress on the skin.
- Clear, two-color instructions for the correct placement of the electrodes.
- Multifunctional – one electrode for different applications.
- Radiotranslucent design minimizes visibility in X-ray imaging.
- Each set is subject to a comprehensive 100% fit and continuity inspection.

Information

All our Skintact® products are tested according to applicable standards, ensuring maximum safety and reliable performance.

Skintact® Easibeat Multifunction Defibrillation Electrodes meet the relevant clauses of IEC 60601-2-4 for Cardiac Defibrillators, and do comply with ISO 10993 for biocompatibility and the European Medical Device Regulation (MDR).

Multifunctional Radiotranslucent Defibrillation Electrodes for Adults

Used for external defibrillation, non-invasive pacing, synchronized cardioversion and monitoring for adults and children.

DF20N

Compatible with	**Physio – Control:** Lifepak 12, Lifepak 15, Lifepak 20/20e, Lifepak 500, Lifepak 1000 **Comen:** S1, S5, S8
Cable length	1,2 m
Color code	

DF20NC

Compatible with	**Physio – Control – preconnect:** Lifepak 12, Lifepak 15, Lifepak 20/20e, Lifepak 500, Lifepak 1000
Cable length	1,2 m
Color code	

DF27N

Compatible with	**Philips Heartstart:** FR2, FR2+, FR3 (electrode self-test is not supported) With adapter cable M3508A or M3507A and adapter 05-10200: Philips Heartstart MRx, XL, XL+, Efficia DFM100, Intrepid
Cable length	2,0 m
Color code	

DF27NC

Compatible with	**Philips Heartstart – preconnect:** FR2, FR2+, FR3 (electrode self-test is not supported) With adapter cable M3508A or M3507A and adapter 05-10200: Philips Heartstart MRx, XL, XL+, Intrepid
Cable length	2,0 m
Color code	

DF28N

Compatible with	**Zoll:** Series M, E, R and X With adapter cable 8000-0308-01/02, 8009-0749, 8300-0783, 8300-000676
Cable length	1,2 m
Color code	

DF28NC

Compatible with	**Zoll – preconnect:** Series M, E, R and X With adapter cable 8000-0308-01/02, 8009-0749, 8300-0783, 8300-000676
Cable length	1,2 m
Color code	

DF26N

Compatible with	**Philips:** With adapter cable M3507A: Philips Heartstart MRx, XL, XL+, Efficia DFM100, Intrepid
Cable length	1,2 m

DF43N

Compatible with	**Nihon Kohden:** With pad adapter JC-755V: TEC-5500 Series, TEC-7600 Series, TEC-7700 Series With pad adapter JC-855V: TEC-8300 Series
Cable length	2,0 m

Packaging

All Skintact® Easibeat Multifunction Defibrillation Electrodes

1/pouch 10/box 60/case

Multifunctional Defibrillation Electrodes for Pediatrics

Skintact®

Used for external defibrillation, non-invasive pacing, synchronized cardioversion and monitoring of pediatric patients.

DF31G

Compatible with	**Physio – Control:** Lifepak 12, Lifepak 15, Lifepak 20/20e **Comen:** S1, S5, S8
Cable length	1,2 m

DF30G

Compatible with	**Zoll:** Series M, E, R and X With adapter cable 8000-0308-01/02, 8009-0749, 8300-0783, 8300-000676
Cable length	1,2 m

DF32G

Compatible with	**Philips Heartstart:** With adapter cable M3508A or M3507A and adapter 05-10200: Philips Heartstart MRx, XL, XL+, Efficia DFM100, Intrepid
Cable length	1,2 m

DF37G

Compatible with	**Nihon Kohden:** With electrode adapter JC-755V: TEC-5500 Series, TEC-7600 Series, TEC-7700 Series With electrode adapter JC-855V: TEC-8300 Series
Cable length	2,0 m

Skintact®

Neutral Electrodes

Especially in electrosurgical procedures, it is important that electrodes and accessories provide absolute safety.

Maximising the full potential of advanced electrosurgery in today's market, not only requires the surgeon's skills but also a reliable range of active and passive accessories. These accessories should offer safety and comfort without compromise to both patient and clinician. Leonhard Lang's range of Skintact® Cool Contact electrosurgical neutral electrodes and pencils provide the highest degree of safety.

Advantages of Skintact® Neutral Electrodes

- Skintact Cool Contact neutral electrodes are available for adults and pediatric patients, with or without a preattached cable.
- Developed by Leonhard Lang, the unique overlapping gel technology eliminates aluminum edge exposure and helps to minimize the risk of burns.
- The rounded leading-edge geometry of the universal neutral electrodes enables more efficient current distribution, helping to maintain a cooler interface between the patient and the neutral electrode.
- The peel-off aid allows easy removal from the liner or the patient's skin.
- The flexible, thin foam backing of the RS and RO series as well as the low-profile fabric backing of the WR series are impermeable to liquids. They conform to the body's contours and provide reliable protection and safety.
- Duplex labels reduce the documentation effort for clinical staff.

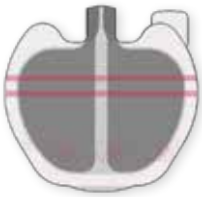

Information

All our Skintact® products are tested according to applicable standards, ensuring maximum safety and reliable performance.

Skintact® Cool Contact Electrosurgical Neutral Electrodes comply with the applicable clauses of the IEC 60601-2-2 standard for high-frequency surgical devices, the ISO 10993 standard for biocompatibility and the European Medical Device Regulation (MDR).

Neutral Electrodes
